Identifying Alien Reproduction Vehicles
(Man Made UFOS)

Speculations of Michael Schratt -Military Aerospace historian.

Man made UFOs occur mostly on Thursday nights. They have bulkheads. They have transparent panels. Most give off an electrical humming noise. They generally have portholes or windows. Most man made UFO can be observed to have tubes, pipes, cylinders, mufflers. Man made UFOs tend to leave some sort of physical effect on humans if experience close up. Man made UFOs have cloaking technology which can transfer the image from above to the bottom of the craft electronically. Also they can do the same sort of transfer from back to front, or from left to right. This sometimes makes for fuzzy edges. Most have crossbeams and girder construction.

Problem with Speculations:

- 1.)George Adamski, Bill Meier, Bruno Sammaciccia (W56 and CRTs ET), Howard Menger and others
have photos or have stated that most of ships they saw had portholes or windows.
- 2.)When the ETs made a clone of my etheric body and took it to a Martian temple to celebrate my son
Alfie's coming of age celebration (The Hat Ceremony) I experienced a slight humming on the
UFO to and from Mars. (The Hat Ceremony- See my log entry "7-5-2014" Rom Chronological Events)
- 3.)As far as I am aware of there is no statistical date to support the Thursday nights claim.

Confirmed ET Statement to me:

- 1.)Man made UFO can accelerate from zero to 500 mile per hour in one second.
Very Limited inertia
damping effect. Our crafts can go from zero to one million mile per hour in one second.
- 2.)Earth ships can not change the shape of their ship. Our ships can become a frog, tree or airplanes.
Any image a human can think of we can manifest. Made man UFOs are stuck in the manufactured
physical state.

3.)Man Made UFOs can not leave earth's low orbit. Currently around 50 miles is their upper limit.

4.)Man Made UFOs can not travel in wormholes.

5.)The ETS have crafts that are well over 50 miles wide. The largest Earth aircraft hanger is about $\frac{1}{2}$ a mile wide.

6.)Man Made UFOs have a static or permanent fixed array of lights on the outside of their ship. ETs have changing patterns and colors of lights

Conclusion: The main function of Alien Reproduction Vehicles is to instill a fight or fright

response in humans. This is done for disinformation and black budget purposes.

July 2019 update.
